

The instructions of the Central Committee of the Communist Party of China on stopping the study of party rectification and all-out transfer to the "three antis" movement

Date:1951-12-26

Central Bureaus:

According to the internal situation report of the Southwest Branch of Xinhua News Agency on December 22: "The southwest region has stopped the original planned study of party rectification and has made every effort to turn to the anti-corruption, anti-waste, and anti-bureaucratic rectification movement. The Southwest Bureau, the Southwest Military and Political Commission, and the Southwest Military Region have all held party congress meetings. Eastern, western Sichuan, northern Sichuan, southern Sichuan, Xikang and Chongqing have made general calls, and other places will also enter the mobilization stage. According to recent preliminary findings: the Ministry of Industry is about 80 billion yuan, of which the two major corruption cases of Xiao Ziyang and Chen Songbai amounted to 20 billion yuan; The Ministry of Finance initially inspected 30 billion yuan, of which the grain bureau system was the most serious. Corrupt elements of the Western Sichuan Grain Bureau colluded with profiteers to steal the grain payment book

Profiteers went to various warehouses to collect grain and lost 100,000 pounds of public grain. A box of RMB was stolen from the treasury of the Department of Finance in northern Sichuan, and the corrupt elements left a note saying: 'I am in trouble, so I will borrow it for the time being'. Corruption and waste in construction are the most common, and it is preliminarily understood that it has reached tens of billions of yuan. the transportation system is corrupt and wasted about 50 billion yuan". The Central Committee believes that it is completely correct for the Southwest Bureau to stop the original study plan for party rectification and to fully switch to the anti-corruption, anti-waste, and anti-bureaucratic rectification campaign.
